A mechanical retractor system, the Iron Intern, is shown against a black background. The device consists of a vertical base with a horizontal arm extending to the left. At the end of this arm is a hand-like mechanism with five fingers, each ending in a curved, gripping surface. The hand is holding a white rectangular sign. The sign contains the text: 'Only God makes a better arm.' in a large, bold, blue font, followed by 'Of course, I never get tired.' in a smaller, blue font. The retractor is mounted on a stand with a base that has a circular foot.

**Only God makes
a better arm.**
Of course,
I never get tired.

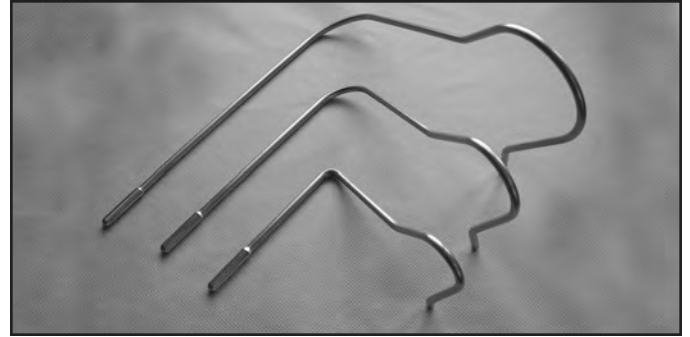

You work tirelessly, he works tirelessly. You're dedicated, he's dedicated. You have years of education...he works tirelessly. A surgeon couldn't ask for a better assistant than the Iron Intern®. He can hold a retractor steady for hours, always applying the right pressure, and adjusting his grip precisely as needed. And unlike a human arm, he allows optimal vision and maximal access to the operative site. With the Iron Intern® assisting you, you're free to do the job you're trained for. Call us at 800.832.4567 and arrange a 21 day free trial.

The Iron Intern® Mechanical Retractor

MINIMAL INVASIVE SURGERY KIT

NATHANSON HOOK LIVER RETRACTORS

Nathanson Hook Liver Retractors are designed specifically to retract the liver during laparoscopic surgery. When required, these hooks hold the liver out of the way for the duration of the surgery. They come in a set of three (small, medium, and large) allowing the surgeon alternative options during the procedures. The Nathanson Hook Liver Retractors are easy to clean, and last forever. A fixed retractor system is required. We highly recommend the Iron Intern® (another fine instrument sold by Automated Medical Products).

IRON INTERN® FOR LAPAROSCOPIC SURGERY

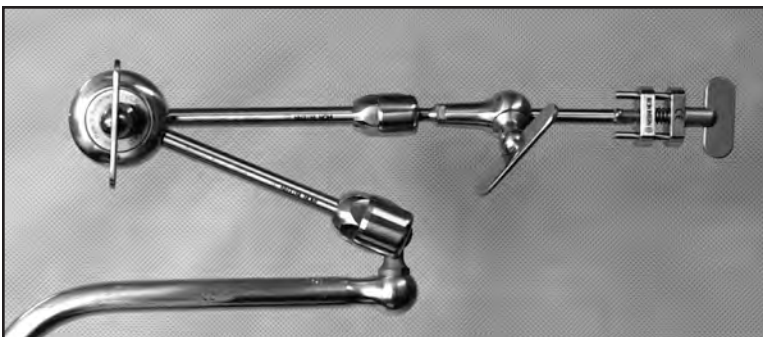

Hydra 22"
with LC1 and LC2

ARH 22"
with the Nathanson Liver
Retractor, medium size.

ARH 22"
with LC1 Greenstein Gripper.

The Iron Intern® is helpful in general, bariatric, and transplantation surgery. The Iron Intern® is adapted for laparoscopic surgery with the use of the Greenstein Grippers and the Nathanson Hook Liver Retractors.

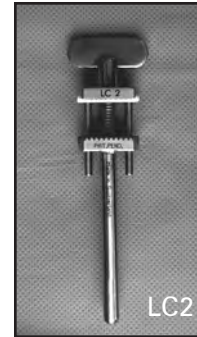

MINIMAL INVASIVE SURGERY KIT

GREENSTEIN GRIPPER CLAMPS LC 1, LC2 & LC3

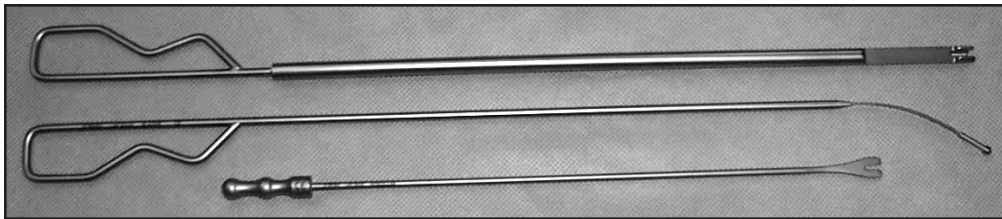

LC1 Greenstein Gripper Clamp specially designed to hold instruments, trocars, and scopes during laparoscopic surgery. Holds diameter from 3mm-12mm.

LC2 Greenstein Gripper Clamp specially designed to hold the body of disposable trocar during laparoscopic surgery.

LC3 Greenstein Gripper Clamp specially designed to hold reusable trocar during laparoscopic surgery.

O'BRIEN LAP BAND SET

A set of three O'Brien instruments is used with the Lap Band System from BioEnterics. In an effort to simplify the Lap Band gastric banding procedure, Paul E. O'Brien, MD has designed the following instruments:

O'Brien Introducer

is designed to introduce the device into the abdominal cavity.

O'Brien Placer

is designed to assist the passing of the Lap Band® behind the esophagus. A flexible tip with a notch allows the instruments to enter a 5mm trocar. The tip is blunt so the possibility of perforating structures is minimized.

O'Brien Closer

designed to facilitate the closing of the lap band. The O'Brien Lap Band Closer® 10mm in diameter and has a non-traumatic, smooth end.

EXTRA LONG ARTICULATING DISSECTOR

Extra Long Articulating Dissector

- Articulation to 90°
- Slotted tip to carry ligatures, arterial tapes, bands...
- Lightweight
- Long-life insulation material
- Disassembles for thorough cleaning
